

FLEXIBLE LED STRIPS

Atmosphere enhancing LED lighting strips for both in- and outdoor use.

The strips can be made longer by soldering or can be shortened by cutting them to size.
The strips have a 120 degree wide angle which ensures they light evenly and do not cast shadows on surfaces.

Ideal as decorative lightning or to light confined and small spaces.

LAMP LR03CW

- 60 LED/Meter
- SMD
- LED type 5050
- DC 24V / 72 W
- 5 meter
- Cold white

Trafo

LED TRF02

Power supply

P.SUP.NBT70H1
P.SUP.NBT90K1

Outdoor

LAMP LR06CW

- 30 LED/Meter
- IP65
- SMD
- LED type 5050
- DC 24V / 72 W
- 5 meter
- Cold white

Trafo

LED TRF02

Power supply

P.SUP.NBT70H1
P.SUP.NBT90K1

*These transformers for divided 12V LED strips (LAMP LRxxxx) in 3/6 or 10W segments.

Technical information

LED TRF03	3W	E.g. LAMP LR01CW 36LEDs or LAMP LR02CW 12LEDs	Current per LED type 3528 -> 0.08A
LED TRF04	6W	E.g. LAMP LR01CW 72LEDs or LAMP LR02CW 24LEDs	Current per LED type 5050 -> 0.24A
LED TRF04	10W	E.g. LAMP LR01CW 123LEDs or LAMP LR02CW 39LEDs	Current per LED type RGB -> 0.24A

The led strips can be cutted in segments of minimum 3LEDs

Maximum LEDs = Wattage power supply / Current per LED

E.g. 10 W / 0.24A = 41.66 -> /3 = 13.88 use 13x3 = 39 LEDs

FLEXIBLE LED STRIPS

Atmosphere enhancing LED lighting strips for both in- and outdoor use.
