

# Data sheet:

## Wireless pc on tv

Product code : MD-300  
 Product name : Wireless pc on tv  
 EAN code : 8716502025206

### Bring your photos, music, movies, online videos, websites, and games from your PC to your TV

With the Wireless PC-on-TV you can bring any content from your computer screen to the big screen of your TV in HD quality (720p).

Give your holiday pictures and home videos a second life whether they are stored on your computer or online. Watch them on the big television screen, revel in memories and share the experience with friends and families, all in the comfort of your living room.

Make use of the web browser to enjoy online entertainment on the big screen of your television: watch your favorite YouTube video, a movie purchase or rental bought online or last night's episode of your favorite TV Show through the TV channel's website.

Listen to your favorite songs from your music library or from Internet Radio Stations using the high quality speaker system that your TV is equipped with or connected to.

Use all the programs that are installed on your computer on the big screen of your TV. Enjoy a video-chat with family and friends or play your favorite computer games in HD quality.

The Wireless PC-on-TV can be used with up to 8 Windows or Mac computers with the supplied software. Moreover, you can also share photos from your smartphones or tablets on the big TV screen with the free Photo Sender App for Apple, Android and Blackberry devices. The Photo Sender App lets you watch your pictures in a slide show and lets you pause, play and navigate back and forth any time. You can even rotate photos while you are watching them.

To control the Wireless PC-on-TV you can connect a wireless keyboard and/or mouse to the USB port of the device and easily control your computer or notebook from the sofa. Alternatively, download the MirrorOp Receiver app and control the Wireless PC-on-TV with your Android device or iPad.
