

REAL LCD TV & GAME BOX LUXE

High Resolution 9 bits

- **Watch TV** directly connected to your monitor, even without PC turned on.
- **Support** traditional CRT, LCD and Plasma monitors
- **New 3rd generation** 3D edge enhanced interpolation algorithm chip.
- **Up to 1280x1024@75HZ** resolution.
- **New generation** digital de-interlace chip, 9bits Philips ADC, high picture quality.
- **Support** multi-resolution switchable, support picture freeze function.
- **With** Gamma correction, volume control, OSD, position control.
- **Fully** IR remote controlled functions.

FEATURES

- Full Just Hardware (Plug and Play). No software or driver required. No PC compatibility problem.
- Support LCD, CRT and Plasma monitors.
- Use digital frequency doubling technology, support variable resolution modes such as 640x480@60,75 Hz; 800x600@60,75 Hz; 1024x768@60,75 Hz; 1280x1024@60,75 Hz.
- With variable digital picture enhancement technology and digital noise reduction technology, a home theatre is brought to you.
- Automatic source mode detection (NTSC/PAL for video 1&2, S-Video). All supplementary TV reception, composite PAL D/K and PAL I mode.
- Bright/Contrast/Saturate/hue/H. SHARP/V. SHARP/Gamma adjustment.
- Provide user-friendly multilingual OSD (on screen display) to control functions.
- Support switchable input sources (TV, Composite-Video, S-Video and VGA).
- Full-function remote control, including video freeze-frame function.

TECHNICAL INDEX

- Receivable channels: DS1-57CH, Z1-38CH (470MHz all supplemented TV channels
- Program memories 150
- Vertical frequency 60 Hz / 75 Hz
- Horizontal frequency 31.5 KHz – 80 KHz
- Radio frequency antenna 75Ω cable TV (CATV)
- Working power consumption 4.5 W
- Standby power consumption 150 mW

APPLICATIONS

Just connect your Real LCD TV & Game Box with your computer monitor, without turning on your computer. Use the IR remote control keys to control the monitor's source input and resolution.

The Real LCD TV & Game Box uses a new type of digital chip, obtaining a brilliant colour and high quality picture display, incomparable with the general low-level price TV.

Support variable resolutions, the maximum resolution is 1280x1024 @75 Hz. Blink-free picture, your eyes won't be easily tired after a long time of watching the screen.

Dynamic sensing picture. Line-by-line scanning function to reduce the row structure line and row interlace effectively as well as video compensation function to reduce the motion saw-tooth.

Digital pectinate filter, powerful colour reversion, high-definition and high quality picture. Real LCD TV & Game Box provides **full TV functions** and full support to LCD monitors, converting your flat monitor into a LCD TV comparable to a luxury LCD TV.

Connect your game console PS1/PS2/XBOX with the Real LCD TV & Game Box. You will be able to connect your PS1/PS2/XBOX game console by the Video Composite or S-Video inputs of the Real LCD TV & Game Box.
