Solución de problemas :

- 1 Asegúrese de que todos los cableados son correctos. (Por favor mire 41 a 44, en la páginas 23 y 24).
- 2 Si el brazo robótico no tiene ninguna respuesta al mando con cable, compruebe la inf "BATTERY" y "GND" estén en la posición derecha, y también si las baterías se colocan en la polaridad correcta. (Por favor, consulte dibujo en la página 19 de 13)
- 3 Si el brazo robótico se mueve dirección equivocada, verifique que cableado de la M1, M2, M3, M4, M se invierten por favor. (Ver dibujo 41-44, en página 23 y 24).
- 4 Si el faro no se enciende, compruebe si el conector "L" es correcto. (Por favor refiérase 41 a 44, en la página 23 y 24).

¿Cómo funciona?:

* Ver funcionamiento en CD adjunto .

- Nota: 1 Todos los engranajes van equipados con equipo de seguridad, cuando el brazo de apertura, cierre, arriba o inferior a la máxima posición, y el usuario sigue empujando los botones, el equipo de seguridad comenzará a proteger la caja de cambios y hacer que "da, da, da "sonar.
 - 2 Para prolongar la vida útil de la caja reductora una vez que escuche el equipo de seguridad emiten "da, da, da" de sonido, deje de presionar los botones .

NOTA: Este kit esta recomendado para niños a partir de 12 años, siempre acompañado por un adulto
